Packing list

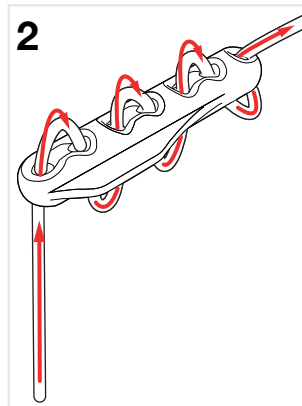

Set of 5 shock absorbers

Positioning shock absorbers

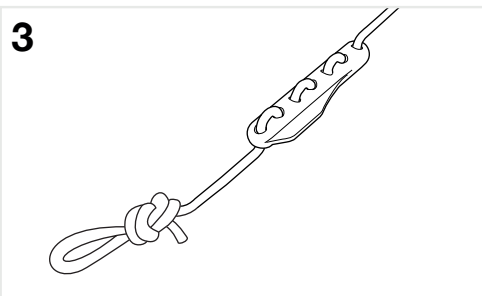

If the wind is blowing in one direction towards your tent, it's recommended to install the shock absorbers on that side. In case of gusts coming from multiple directions, it's best to place a shock absorber on each guylines.

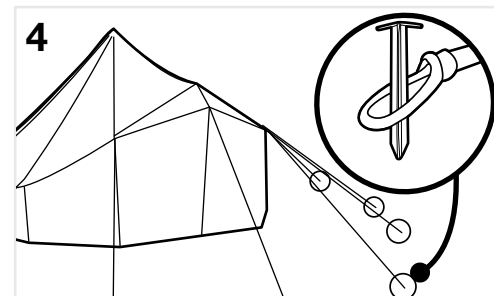

1 Untie the loop at the end of the guylines.

2 Insert the guylines through the shock absorber.

3 Retie the guylines.

4 Peg down all guylines by using T-pegs.

Number of shock absorbers needed per tent:

Little	11
Middle	9
Large/Jay/ Essential 4.4	13
Major/Jack/ Essential 5.2	13
Billy-Joe	16
Shade 20	8
Shade 30	10
